Experiment - 5(b) : Dashboards

Aim:

To create and configure a dashboard in Zoho Creator for visually representing and analysing job application data using panels, charts and reports.

Theory:

Dashboards in Zoho Creator are Pages built with the Page Builder. They combine components such as panels (KPI values), charts, gauges and embedded reports in one screen. Charts use the form data directly with aggregate functions such as Count and Sum, so the dashboard updates automatically when new applications are submitted.

The **Recruitment_Dashboard** shows the total number of applications, applications per department, the split of applications by hiring status and the list of applications.

Procedure:

1. Open the Recruitment & Job Application Management application in Edit mode.
2. Click **+** → **Page** → **Blank** and name the page **Recruitment_Dashboard**.
3. Drag a **Panel** element and set Display data to **Count** of Job Application Form; label it Total Applications Received.
4. Drag a **Column** chart; set Category = Department Applied For and Aggregate = Count of Application ID.
5. Drag a **Pie** chart; set Category = Status and Aggregate = Count of Application ID.
6. Drag a **Report** element and embed **All_Applications_List**.
7. Arrange the components and click **Done** to save the page.
8. Open the page in live mode and verify the values.

Output:

Paste screenshot here (with browser address bar)
Page Builder showing Panel, Column chart, Pie chart and Report on Recruitment_Dashboard

Fig. 5b.1: Dashboard Design in Page Builder

Paste screenshot here (with browser address bar)
Chart Configuration panel with Category = Department Applied For, Count of Application ID

Fig. 5b.2: Chart Configuration

Paste screenshot here (with browser address bar)
Live dashboard: 12 Total Applications Received and the department column chart

Fig. 5b.3: Total Applications and Applications by Department

Paste screenshot here (with browser address bar)
Live dashboard: status pie chart and All_Applications_List

Fig. 5b.4: Applications by Status and Embedded Report

Observation:

Dashboard Component	Value Shown
Total Applications Received	12
Applications by Department	Engineering 4, Data Science 2, Marketing 2, Sales 2, Human Resources 1, Finance 1
Applications by Status	Applied 3, Screening 2, Interview 5, Offer 1, Rejected 1

Result:

The Recruitment_Dashboard was created in Zoho Creator. It visually represented the job application data using a KPI panel, column and pie charts and an embedded report, enabling quick monitoring of the hiring pipeline.
