EXP 15 : Career Pathways in Low-Code Development and Certification Planning

Aim:

To study the career pathways in low-code development and to plan the certifications needed to build a career, using the experience gained from building the Job Application System.

Theory:

Low-code development is growing fast because organisations want applications quickly. People who can build apps with low-code tools and also understand basic coding are in high demand. Platforms such as Zoho Creator, Microsoft Power Apps, OutSystems, Mendix and Salesforce offer jobs and certifications.

Career Roles:

Role	Main Work	Skills Needed
Citizen Developer	Builds simple apps for own team (e.g. an HR tracker)	Forms, reports, basic workflows
Low-Code Developer	Builds business apps for clients	Zoho Creator, Deluge, integrations
Low-Code Solution Architect	Designs large, secure solutions	Data modelling, security, APIs
Automation / Workflow Specialist	Automates business processes	Workflows, schedules, email/API
Business Analyst	Converts needs into app designs and reports	Requirement analysis, dashboards
Pro-Code / Hybrid Developer	Extends apps with code	JavaScript, Java, Catalyst, REST APIs

Certifications:

Platform	Certification	Level
Zoho Creator	Zoho Creator Certified Developer	Beginner / Intermediate
Microsoft Power Platform	Fundamentals (PL-900)	Beginner
Microsoft Power Platform	Developer (PL-400)	Advanced
OutSystems	Associate Reactive Developer	Intermediate
Mendix	Mendix Rapid Developer	Beginner
Salesforce	Platform App Builder	Intermediate

Scenario: Skills Gained from the Job Application System

- Data modelling with Name, Address (geo-coded), Auto Number, Drop Down and Radio fields.
- Nine report types - List, Spreadsheet, Kanban, Calendar, Map, Timeline, Pivot Table, Chart and Summary.
- Dashboards with KPI panels and charts in the Page Builder.
- Workflows and Deluge scripts for validation and email notification.

- Roles, permissions and security settings.
- Deployment using Development, Stage and Production environments.
- Pro-code extension using custom functions.

Certification Plan:

Period	Goal	Action
Month 1 - 2	Strengthen Zoho Creator basics	Finish Zoho Creator learning modules and practise apps
Month 3	Zoho Creator certification	Prepare and take the Zoho Creator developer exam
Month 4 - 5	Learn another platform	Study Microsoft Power Platform and take PL-900
Month 6	Pro-code skills	Learn JavaScript and Zoho Catalyst functions
Month 7 onwards	Build a portfolio	Publish projects like the Job Application System and apply for internships

Result:

The career pathways in low-code development were studied and a certification plan was prepared, using the skills gained while building the Job Application System in Zoho Creator.
